

# Used Fluid Reclamation Program

Recycle / Renew / Reuse with TMC

## CUT COSTS AND MINIMIZE WASTE BY RECLAIMING OILS AND SOLVENTS

- Fluid reclamation provides significant savings over the cost of new fluid and helps protect the environment by drastically reducing your waste stream.
- Reclamation restores inert PFPE and silicone fluids to their original state at about one-third the cost of new fluids.
- Fluids can be reclaimed and reused many times to gain greater cost efficiencies. Under most conditions, you can expect 85-90% of the contaminated fluid to return to like-new quality. Customers often ask that we add virgin material to return the same quantity sent in for reclamation.
- Reclamation reduces your hazardous waste disposal, ensures proper management of used fluids, and achieves better environmental stewardship. TMC Industries properly disposes of all contaminants.
- Combined with your preventative maintenance program, using reclaimed fluids can decrease downtime on equipment and significantly reduce your MRO cost.

## REDUCE DISPOSAL COSTS

TMC Industries reclaims your contaminated fluids to their original state and purity and returns them to you at about one-third the cost of replacing them with new fluids.

Return of Used Fluid	Estimated Disposal Cost	Paid By
55 Gallon Drum	\$845 - \$3,000	TMC
30 Gallon Drum	\$625- \$1,500	TMC
Paper Profile	\$75	TMC
Fuel Surcharge	\$9.85	TMC
Total		Free

**NOTE:** TMC will cover the cost of returning 30 or more gallons of their fluids. However, if the returned quantity is less than 30 gallons, the customer will be responsible for all related expenses. The costs will be determined based on the quantity and profile of the fluid.

## WHAT OILS, SOLVENTS, AND SPECIALTY FLUIDS CAN BE RECLAIMED?

TMC's oil reclamation process safely recovers all inert and semi-inert vacuum pump fluids, diffusion pump fluids, oils, and many fluorinated fluids, including:

- PFPE oils – Krytox™ & Fomblin®
- CTFE oils – HaloVac® H190, H125, H100, & H27
- Perfluorocarbons (PFCs) – PF5050, PF5060, PF5070, PF5080
- 3M™ Fluorinerts™ – FC-40, FC-43, FC-77, FC-770, FC-3283, etc.
- Fluorocarbon Heat Transfer Fluids – Galden® HT
- Silicone Diffusion Pump Oils – DC-702, DC-704, & DC-705 and equivalents
- LENIUM FHD Vapor Degreasing Solvent

**NOTE:** No hazardous waste materials are accepted.

# Used Fluid Reclamation Program

Recycle / Renew / Reuse with TMC

## HOW IT WORKS:

### CHOOSE FROM OUR TWO PROGRAM OPTIONS:

1. Send us your used fluid. TMC will use a proprietary distillation process to reclaim the material to its original state, produce a Certificate of Analysis, and ship it back to you for a fraction of the cost.

OR

2. If your company requires you to dispose of used material, TMC will recycle the material at no charge.

### PREPARE THE SHIPMENT BY PROVIDING:

- Company name, address, and telephone number
- Product name and EPA ID number
- Quantity of used material and size of the shipping container (program requires 30 or 55 gallon size shipping containers)

### COMPLETE AN ONLINE FORM TO GET STARTED:

To start the process, submit our online Reclamation Return Request and Material Declaration forms by visiting:

<https://tmcindustries.com/pages/reclamation-order-form>

and

<https://tmcindustries.com/pages/material-declaration-form>

You will be contacted within 24 business hours by an account manager to start the process.

After your profile is approved, we will arrange to collect the used fluid from your business. We collect used fluids from US and international locations.

TMC will provide completed paperwork and drum labels for pickup.

### QUALITY ASSURANCES:

We guarantee our reclaimed oils and solvents to have like new qualities and performance capabilities. To support our confidence, pre- and post-processing analytical data accompanies each shipment.
